

How to Use Each Tool

Step-by-step instructions for all 17 built tools

General note: every tool opens as an interactive preview when you click it. Everything described below (clicking, dragging, typing) happens directly inside that preview window — no setup needed to try it.

Trackers & Progress Tools

1. Universal Tour Tracker (Functional)

`universal-tour-tracker-functional.jsx`

1. Click any checkpoint to simulate a visit — watch the progress bar and % fill
2. Click the gear icon to enter Config mode — here you type the exact panorama name for each real stop in your tour
3. Click the `</>` code icon to reveal the real integration code
4. Click "Copy," paste into 3DVista as a Global JavaScript Action, publish

2. Market Guides Booth Tracker

`market-guides-booth-tracker.jsx`

1. Click any booth to simulate a visit
2. At 100%, watch the discount code reveal
3. Click the reset icon (top right) to start over

3. Floorplan Pin Tracker

`floorplan-pin-tracker.jsx`

1. Click any room on the floorplan to "navigate" there
2. Watch the pin turn blue (current) and previous stops turn green (visited)
3. Click the `</>` icon for the real integration code using 3DVista's `onPanoramaChanged` event

4. Portfolio Map (Live Version — Use This One)

`portfolio-map-live.jsx`

1. Tap the "+" icon (top right) to open the add-project form
2. Enter the real project name, category, description, and the actual tour URL
3. Set rough position on the map using X/Y percentage (0-100 each)
4. Tap "Add Project" — it saves automatically and will still be there next time you open this tool
5. Tap any pin to view details and open the real "View Tour" link in a new tab
6. Use the trash icon on a selected project's card to remove it

4b. Portfolio Map (original demo — superseded)

`portfolio-map.jsx`

1. Same interaction as the live version, but uses fake sample projects and doesn't save — kept only for reference

Retail & Sales Tools

5. Deal Hotspot

`deal-hotspot-prototype.jsx`

1. Click the pulsing orange tag icon in the center
2. Watch the deal card open with a real, live countdown timer
3. Click the X to close and return to the hotspot view

6. M.P. Productions Proposal Builder

`mp-productions-proposal-builder.jsx`

1. Step 1: fill in client name, company, email — click Continue
2. Step 2: choose "Comprehensive Review" or "I Know What I Need"
3. Step 3: use +/- buttons to add real services with real pricing
4. Step 4: review the itemized proposal, adjust discount %, click "Print / Save as PDF"

3DVista Code Generators (Copy → Paste Into 3DVista)

7. Interactive Element Generator

`mp-3dvista-element-generator.jsx`

1. Choose a tab: Attention Pulse, Show/Hide Timer, or Fade Transition
2. Adjust the sliders/colors — the preview updates live
3. Click "Copy" at the bottom, paste into 3DVista's matching CSS/JS field

8. AutoHide

`autohide-demo.jsx`

1. Click between the tab buttons (Location, Hours, Contact, Pricing)
2. Notice only one panel is ever visible at once
3. Set your own group tag name, copy the generated code

9. Responsive Menu Builder

`responsive-menu-builder.jsx`

1. Click the menu icon (top right) to slide the menu open
2. Click "Booths" to see the submenu/back navigation
3. Copy the integration code from the bottom panel

10. Callout Generator

`callout-generator.jsx`

1. Pick a Style (Line Extend, Flip Open, Simple, With Subtitle)
2. Pick a Direction (left/right/top/bottom) — watch the preview reposition
3. Set your accent color, title, and subtitle
4. Copy the generated CSS/HTML

Voice & Navigation

11. Voice Navigation Assistant

`voice-nav-assistant.jsx`

1. Click the microphone button (allow microphone access if prompted)
2. Say a panorama name out loud, e.g. "Gallery Hall A"
3. Watch it show what it heard and whether it found a match
4. Works best in Chrome or Edge

3D Configurators

12. Vehicle Configurator Demo

`vehicle-configurator-demo.jsx`

1. Click any color swatch — watch the 3D body repaint in real time
2. Click the roof toggle button to add/remove the hardtop
3. The shape auto-rotates so you can see every angle

13. Boat Configurator Demo

`boat-configurator-demo.jsx`

1. Click hull colors and flag colors to change them live
2. Click the cabin toggle to add/remove the enclosed cabin
3. Notice the gentle bobbing motion simulating water

Branding & Color Tools

14. Full Color Variety Comparison

`full-color-variety-comparison.jsx`

1. Click "Market Guides" or "M.P. Productions" at the top to switch brands
2. Click between the 3 option tabs for that brand
3. Read the "Why this one" rationale box for each — this is real reasoning, not just a color swap

15. MP Pro Color Comparison (earlier version)

`mppro-color-comparison.jsx`

1. Click between Studio Dark, Heritage Light, and Modern Hybrid
2. Same sample proposal layout shown in each, so you're comparing real usage

Older / Original Versions (Kept for Reference)

16. Original Checkpoint Tracker

`checkpoint-tracker-prototype.jsx`

1. Click booths to simulate visits — this was the first version before the Universal and Market Guides versions replaced it

17. Universal Tour Tracker (original, pre-functional)

`universal-tour-tracker.jsx`

1. Same interaction as the Functional version, but without real 3DVista code — superseded by tool #1 above
